

SUSTAINABLE PROCUREMENT POLICY

In line with our sustainable procurement approach, our suppliers/business partners must:

- Have Quality Assurance Management Systems, Environmental and Occupational Health and Safety Management Systems, and internationally recognized environmental and sustainability ethics/certifications,
- Ensure that their production and procurement processes do not have any harmful effects on the environment and comply with environmental regulations,
- Use/consume resources in an appropriate manner without harming natural life or ecosystems, and comply with hunting bans,
- Work to minimize and properly manage waste, and offer alternatives such as reduced packaging or bulk packaging for product packaging,
- Offering environmentally friendly, economical, local, ethically sourced, recyclable or recycled materials, organic, bio, vegan, cruelty-free, chemical-free, etc. alternatives,
- Being a local and regional producer/service provider,
- Offering products/services that reflect/promote our country's/region's cuisine, traditions, and culture,

We value these principles and communicate this perspective to our supplier partners. We strive to create efficient purchasing opportunities with our suppliers and aim to reduce the environmental impacts arising from procurement processes.
